HCNP-Storage-CUSN(Constructing Unifying Storage Network)

QUESTION NO: 1

Which of the following options does not belong to the hardware components of IP SAN?

- A. Ethernet connected devices
- B. iSCSI Host bus adapters
- C. Storage Device
- D. initiator Starter

Answer: D

QUESTION NO: 2

Which of the sharing manners are Reliability Technology Cluster used in storing data? (Selected 3 answers)

- A. Mirror mode
- B. No sharing
- C. Full-sharing
- D. Manual mode

Answer: A, B, C

QUESTION NO: 3

In the multipath environments of iSCSI link, for failover failures, which aspects will be usually diagnosed? (Selected 3 answers)

- A. Confirm the compatibility of open-iscsi and multipath
- B. Check Multipath Service started or not and Multipath module loading
- C. Check Controller Status, especially Peer controller

D. Check the Parameter configuration of /etc/iscsi.conf document ConnFailTimeout=0

Answer: A, B, C

QUESTION NO: 4

In the same case of IO environment and disk type, which of the following description of RAID5/RAID10 Performance Comparison is wrong?

A. Space utilization: Raid5 is obviously better than Raid10

B. Security: Raid5 is lower than Raid10

C. When read the business which belongs to large files, the performance of Raid5 is obviously better than Raid10

D. When read the business belongs to the Radom small IO, Raid5 is the best choice

Answer: D

QUESTION NO: 5

A control box of S5500 configured eight FC 300G and eight SATA 1T hard drives.Five FC 300G hard drives made RAID group 0, Five SATA 1TB hard drives made RAID group 1.Now, want to configure global hot spare disk for storage, in this case, how to configure it?

A. A FC 300GB disk set to global hot spare disk

B. A SATA 1TB disk set to global hot spare disk

C. A FC 300GB disk and a SATA 1TB disk set to global hot spare disk, respectively.

D. In this configuration, this device cannot configure global hot spare.

Answer: C

QUESTION NO: 6

LUN Dynamic expansion can expand LUN between different RAID group.

A. True

B. False

Answer: A

QUESTION NO: 7

For LUN copy function of storage array, the same LUN cannot be target LUN of multiple incremental LUN copy.

A. True

B. False

Answer: A

QUESTION NO: 8

Which basic functions can log analysis function of maintenance Assistant achieve? (Select 3 answers)

- A. Log import
- B. Log filter
- C. Keyword Search
- D. Information collection

Answer: A, B, C

QUESTION NO: 9

In the process of SAN storage controller troubleshooting, before replacing the controller, in order to ensure that data is consistent, just make sure that LUN of belonging to controller can send IO when there is no host, don't have to do other operations.

- A. True
- B. False

Answer: B

QUESTION NO: 10

Multi-path software failover and failback process apply transparent to the host, to avoid the path failure between the host and array which led to the suspension of IO.

- A. True
- B. False

Answer: A

QUESTION NO: 11
