**QUESTION NO: 1**

What does the following HTML5 code fragment do?

```
<video controls>
  <source src="myVacation.avi" type="video/avi">
  <source src="myVacation.ogg" type="video/ogg">
</video>
```

- A. It plays the myVacation.avi video if the browser supports it; otherwise, plays the myVacation.ogg video if the browser supports it.
- B. It plays two videos: first myVacation.avi, and then myVacation.ogg.
- C. It plays both videos simultaneously, myVacation.avi and myVacation.ogg.
- D. It prompts the user to choose which format of the myVacation video it should play, .avi or .ogg.

**ANSWER: D**

**QUESTION NO: 2 - (DRAG DROP)**

DRAG DROP

Match the properties to the corresponding values for creating the CSS flexible box layout.

Instructions: To answer, drag the appropriate property from the column on the left to its value on the right. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct match is worth one point.

**Select and Place:**

Property	Value	
display	rl   lr   tb   bt	Property
flex-align	auto   baseline	Property
flex-pack	any	Property
flex-order	flexbox   inline-flexbox	Property
flex-direction	start   end   center   justify	Property

ANSWER:

Property	Value	
	rl   lr   tb   bt	flex-direction
	auto   baseline	flex-align
	any	flex-order
	flexbox   inline-flexbox	display
	start   end   center   justify	flex-pack

Explanation:
