QUESTION NO: 1

What are two ways to lower the risk of a virus or malware infection? Choose two.

A. Enable the Windows firewall

B. Use only HTTPS while web surfing

C. Keep the system updated

D. Install a download manager

ANSWER: A C

QUESTION NO: 2

Your university's IT department currently has no Active Directory strategy.

The university needs a solution that allows you to manage users and groups to secure access to Microsoft online services such as Microsoft Office 365.

Which Active Directory strategy should the university use?

A. Active Directory Federation services

B. Active Directory Lightweight Directory services

C. Active Directory Certificate services

D. Azure Active Directory

ANSWER: D

Explanation:

Azure Active Directory is preintegrated with Salesforce.com, Office 365, Box and many more.

QUESTION NO: 5 - (DRAG DROP)

DRAG DROP

You are setting up the networking for a single-site motel. For three different classes of users, you need to specify the most privileged network segment each can access.

Match each network to the class of users that cam access it.

Instructions: To answer, drag the appropriate network from the column of the left to the class of users on the right. Each network may be used once, more than once, or not at all. Each correct match is worth one point.

Select and Place:

Network		Answer Area	
Private network		Guests	Network
Public network		Employees	Network
Extranet		Business Partners	Network

ANSWER:

Network		Answer Area	
		Guests	Public network
		Employees	Private network
		Business Partners	Extranet

Explanation:

* Guest have only public access.

* Only the Employees have access to the private network.

* An extranet is a private network that uses Internet technology and the public telecommunicationsystem to securely share part of a business's information or operations with suppliers, vendors, partners, customers, or other businesses.

QUESTION NO: 6

This question requires that you evaluate the underlined text to determine if it is correct. When you access a file located on a shared resource, the "most restrictive" permissions take precedence.

Instructions: Review the underlined text. If it makes the statement correct, select "No change is needed". If the statement is incorrect, select the answer choice than makes the statement correct.

A. No change is needed.

B. ACL

C. NTFS

D. share

ANSWER: A

Explanation:

When using share permissions and NTFS permissions together, if there is a conflict in the configuration, the most restrictive permission prevails.
