**QUESTION NO: 1**

In designing a BYOD solution, which implementation is based on extending traditional guest wireless access and providing similar guest-like wireless access for employee personal devices?

- A. Advanced
- B. Basic
- C. Limited
- D. Enhanced

**ANSWER: B****QUESTION NO: 2**

Which wireless deployment mode does not use a wireless controller?

- A. FlexConnect
- B. Centralized
- C. Autonomous
- D. Converged access

**ANSWER: C****QUESTION NO: 3**

Which pillar of Cisco Application Experience helps in application survivability, application adaptability, and virtualization or cloud enablement?

- A. High performance and security
- B. Acceleration and optimization
- C. Visibility and control
- D. Network and application agility

**ANSWER: D**

**QUESTION NO: 4**

What are two characteristics of Smart Business Architecture? (Choose two.)

- A. It has the drawback of not being advanced technology-ready.
- B. It is targeted at organizations with 200 to 1000 connected users.
- C. Its design requires midlevel IT capabilities.
- D. It consists of three primary modular yet interdependent components.
- E. Its design is sophisticated as compared to Cisco Validated Designs.

**ANSWER: B D**

**QUESTION NO: 5**

Which BYOD solution component delivers the necessary services that are required by enterprise networks, such as authentication, authorization, and accounting, profiling, posture, and guest management on a common platform?

- A. Cisco Prime Infrastructure
- B. Cisco Identity Services Engine
- C. Cisco Wireless LAN Controller
- D. Cisco Access Points

**ANSWER: B**

**QUESTION NO: 6**

Which two features are appropriate in describing a Cisco Cloud Intelligent Network? (Choose two.)

- A. Is not an effective solution to cater to the growing demands of the movement to cloud-based services
- B. Provides solely private cloud solutions to customers
- C. Connects data centers to better share and balance resources
- D. Provides single-tiered service level agreements
- E. Integrates the network with the Unified Data Center

**ANSWER: C E**

**QUESTION NO: 7**

Which two choices describe the business benefits of Borderless Networks for end users? (Choose two.)

- A. Budget constraints
- B. Compliance and policy
- C. Privacy and security
- D. Bandwidth costs
- E. Better video quality

**ANSWER: C E**

**QUESTION NO: 8**

Which of these choices provides active and passive monitoring systems, dynamic failure detection, and automatic path correction?

- A. WAAS Sizing
- B. WAAS Express
- C. NetFlow
- D. Performance Routing

**ANSWER: D**

**QUESTION NO: 9**

Which two choices are features of the Cisco Application Visibility and Control solution? (Choose two.)

- A. Exports application performance metrics to your network management software using NetFlow version 5
- B. Chooses network paths dynamically based on performance
- C. Monitors basic flow statistics, response time, latency, jitter, and other performance metrics by application
- D. Identifies and classifies more than 100 but less than 500 applications
- E. Sets the same quality of service priorities for applications

**ANSWER: B C**

**QUESTION NO: 10**

Which two statements about Cisco Cloud Intelligent Network are true? (Choose two.)

- A. It enables users to access their home network from their enterprise network.
- B. It provides single level service level agreements to customers.
- C. It integrates the network with the unified data center delivering a powerful user experience.
- D. It allows simplified management of the network through centralized monitoring.
- E. It is extremely vulnerable to web-based malware.

**ANSWER: C D**
