QUESTION NO: 1

Which of the following can be used by a client's finance department to identify the cost of cloud use in a public cloud environment shared by different projects and departments?

A. Reserved instances

B. Service level agreement

C. Resource tagging

D. RFI from the CSP

ANSWER: C

QUESTION NO: 2

Which of the following are aspects of cloud data availability? (Choose two.)

A. Resource tagging

B. Data sovereignty

C. Locality

D. Zones

E. Geo-redundancy

F. Auto-scaling

ANSWER: D E

QUESTION NO: 3

Which of the following are true about the use of machine learning in a cloud environment? (Choose two).

A. Specialized machine learning algorithms can be deployed to optimize results for specific scenarios.

B. Machine learning can just be hosted in the cloud for managed services.

C. Just one type of cloud storage is available in the cloud for machine learning workloads.

D. Machine learning can leverage processes in a cloud environment through the use of cloud storage and auto-scaling.

E. Machine learning requires a specialized IT team to create the machine learning models from scratch.

F. Using machine learning solutions in the cloud removes the data-gathering step from the learning process.

ANSWER: A D

QUESTION NO: 4

Which of the following explains why a cloud provider would establish and publish a format data sanitization policy for its clients?

A. To establish guidelines for how the provider will cleanse any data being imported during a cloud migration

B. To be transparent about how the CSP will handle malware infections that may impact systems housing client data

C. To provide a value add for clients that will assist in cleansing records at no additional charge

D. To ensure clients feel comfortable about the handling of any leftover data after termination of the contract

ANSWER: D

QUESTION NO: 5

A business analyst is drafting a risk assessment.

Which of the following components should be included in the draft? (Choose two.)

A. Asset management

B. Database type

C. Encryption algorithms

D. Certificate name

E. Asset inventory

F. Data classification

ANSWER: A F

QUESTION NO: 6

An incident response team requires documentation for an email phishing campaign against a company's email server. Which of the following is the BEST resource to use to start the investigation?

A. Audit and system logs

B. Change management procedures

C. Departmental policies

D. Standard operating procedures

ANSWER: A

QUESTION NO: 7

An organization wants to migrate a locally hosted application to a PaaS model. The application currently runs on a 15-year-old operating system and cannot be upgraded.

Which of the following should the organization perform to ensure the application will be supported in the cloud?

A. Risk register

B. Feasibility study

C. Benchmarks

D. Baseline

ANSWER: B

QUESTION NO: 8

Which of the following are the main advantages of using ML/AI for data analytics in the cloud as opposed to on premises? (Choose two.)

A. Cloud providers offer enhanced technical support.

B. Elasticity allows access to a large pool of compute resources.

C. The shared responsibility model offers greater security.

D. AI enables DevOps to build applications easier and faster.

E. A pay-as-you-go approach allows the company to save money.

F. ML enables DevOps to build applications easier and faster.

ANSWER: B E

QUESTION NO: 9

A company is migrating a legacy application to the cloud. Two C-level executives are currently engaged in the initial stages of the migration, and they are planning a rip-and-replace approach.

Before initiating the project, the FIRST step should be to identify:

A. the required network performance.

B. the key stakeholders.

C. the desired CSP.

D. the required cloud services.

E. the required amount of storage.

ANSWER: C D

QUESTION NO: 10

For security reasons, a cloud service that can be accessed from anywhere would make BEST use of:

A. replication.

B. multifactor authentication.

C. single sign-on.

D. data locality

ANSWER: B
