**QUESTION NO: 1**

You use native SQL to access the SAP HANA database. What should you do to retrieve the correct data?

There are 3 correct answers to this question.

- A. Use the UP TO n ROWS addition
- B. Use the tilde symbol (-) to separate qualifier from column name
- C. Use a Comma-separated column list
- D. Specify the database schema if it is not the user's default schema
- E. Explicitly handle the client field

**ANSWER: C D E**

**QUESTION NO: 2**

You want to implement business logic on the database layer.

Which approach do you follow when implementing an ABAP Managed Database Procedure?

- A. The Left-Right approach
- B. The Near-Far approach
- C. The Top-Down approach
- D. The Inside-Out approach

**ANSWER: C**

**QUESTION NO: 3**

You create a check variant in the Code Inspector which includes the check 'Search problematic Select \* statements'. SAP HANA is used as the db

In the check parameters, which value would you use for the percentage of fields that are effectively used? Please choose the correct answer.

- A. A value that you calculate based on the number of tables

- B. A higher value than on a traditional, row-store only based database
- C. A lower value than on a traditional, row-store only based database
- D. The same value as on a traditional, row-store only based database

**ANSWER: C**

#### QUESTION NO: 4

What are the benefits associated with The SAP HANA real-time Operational analytics? There are 2 correct answers to this question

- A. Simplification of massive data
- B. Fast insights into business activity
- C. Query Speed support
- D. High modeling flexibility

**ANSWER: B D**

#### QUESTION NO: 5

Which of the following is not an element of Analytical view? Please choose the correct answer.

- A. Currency conversion is not applicable
- B. Join fact tables
- C. Read Data from the joined database tables
- D. Used to Joined table

**ANSWER: A**

#### QUESTION NO: 6

What are the two Profitability Analysis available with CO-PA Scenario in SAP HANA Modeling? There are 2 correct answers to this question

- A. Account-based Profitability

- B. Costing-based Profitability
- C. Product-based Profitability
- D. Service-based profitability

**ANSWER: A B**

#### QUESTION NO: 7

What is the main function of Static Code Analysis? Please choose the correct answer.

- A. To detect code that would lead to functional or performance issues When migrating to SAP HANA
- B. Integrates with SAP Solution Manager
- C. Integrated into ABAP Development Tools and ABAP Workbench
- D. ABAP source code with performance optimization potential

**ANSWER: A**

#### QUESTION NO: 8

In an ABAP Core Data services (CDS) view, what must you do expose an association for use in another CDS view? Please choose the correct answer.

- A. Include all fields used in the ON condition in projection list
- B. Specify an alias for the target entity
- C. Define the cardinality for the target entity
- D. Specify the other views in which the association can be used

**ANSWER: A**

#### QUESTION NO: 9

Which of the statement is true for SAP HANA?

- A. SAP HANA also uses disc memory to keep backup. In case of power failure the database can be re-stored to the last consistent state.

**B.** In SAP HANA all the data resides in RAM. Hence in case of power failure all the data will be lost.

**ANSWER: A**

#### **QUESTION NO: 10**

Explain the Authorization Concept and the types of privileges associated with it? There are 3 correct answers to this question

- A.** Analytic privileges
- B.** Package privileges
- C.** Application privileges
- D.** Object privileges
- E.** System privileges

**ANSWER: A D E**

#### **QUESTION NO: 11**

Which of the following are performance recommendations when using SAP HANA? There are 2 correct answers to this question.

- A.** Define indexes on the columns that are used in calculations.
- B.** Move data-intensive calculations from the database to an application server.
- C.** Filter data in lower layers.
- D.** Avoid transferring large result sets between database and client applications.

**ANSWER: C D**

#### **QUESTION NO: 12**

What are the advantages of column based tables? (3 correct answers)

- A.** Bigger Data Set
- B.** Better Compression
- C.** Better parallel Processing

D. Faster Data Access

**ANSWER: B C D**

**QUESTION NO: 13**

You use ABAP database connectivity (ADBC) to issue native SQL calls to the database, the native SQL call? Which of the following methods of class CL\_SQL\_RESULT\_SET retrieves the tabular result of the native SQL call? Please choose the correct answer.

- A. SET\_PARAM\_TABLE
- B. SET\_PARAM
- C. EXECUTE\_QUERY
- D. NEXT\_PACKAGE

**ANSWER: D**

**QUESTION NO: 14**

What are the three best approach for Transitioning and optimizing ABAP applications to SAP HANA? There are 3 correct answers to this question.

- A. Scaling
- B. Optimize
- C. Detect
- D. Innovate
- E. Tuning

**ANSWER: B C D**

**QUESTION NO: 15**

You follow the Code-to-Data paradigm in your ABAP coding.

Which of the following scenarios conflicts with the SQL performance guideline "Keep unnecessary load away from the database"?

- A.** Perform business logic and aggregations on database table content, then transfer the results to the application layer.
- B.** Perform join operations on database tables, then transfer the results to the application layer.
- C.** Perform calculations on data transferred to the database layer, then transfer the results back to the application layer.
- D.** Perform text search operations on database table content, then transfer the results to the application layer.

**ANSWER: C**
