Exhibit A shows the SD-WAN rules and exhibit B shows the traffic logs. The SD-WAN traffic logs reflect how FortiGate processed traffic.

Which two statements about how the configured SD-WAN rules are processing traffic are true? (Choose two.)

A. The implicit rule overrides all other rules because parameters widely cover sources and destinations.

B. SD-WAN rules are evaluated in the same way as firewall policies: from top to bottom.

C. The All_Access_Rules rule load balances Vimeo application traffic among SD-WAN member interfaces.

D. The initial session of an application goes through a learning phase in order to apply the correct rule.

ANSWER: A B

QUESTION NO: 4

Which two reasons make forward error correction (FEC) ideal to enable in a phase one VPN interface? (Choose two.)

A. FEC is useful to increase speed at which traffic is routed through IPsec tunnels.

B. FEC transmits the original payload in full to recover the error in transmission.

C. FEC transmits additional packets as redundant data to the remote device.

D. FEC improves reliability, which overcomes adverse WAN conditions such as noisy links.

E. FEC reduces the stress on the remote device jitter buffer to reconstruct packet loss.

ANSWER: C D

QUESTION NO: 5

B. Application, antivirus, and URL, and SSL inspection

C. Datacenter, branch offices, and public cloud

D. Telephone, ISDN, and telecom network

ANSWER: A
